Enrollment Express Frequently Asked Questions

How do I set up a Parent Portal account?

There are instructions in the email that contains the access code and password. Full instructions are available at <https://www.anchorbay.misd.net/parents-/powerschool-portal/>.

- **Already have a parent portal account?** You will go into your account through a web browser and not the app. Go to account preferences, then click the student tab, and then to use the access code and password to “Add” a student. (blue button, top right corner)

Will my student be “approved”?

- If you live in Anchor Bay boundaries and are applying for your “resident building,” your student will be approved.
- If you live in Anchor Bay boundaries and are looking for an in-district transfer to a different building. Fill out the pre-registration form and there will be an in-district transfer form available on the online enrollment site. You are always accepted to your resident building. Approval to the requested building will be based on space availability.
- If you are applying for Schools of Choice, your student will be approved as long as they don't have prior suspensions or an out of county IEP. Anchor Bay has unlimited space for K-12 students. Students with prior suspensions or an out of county IEP will be approved/denied on a case by case basis. Building placements will be based on space available/classroom sizes, those will be reviewed in June, July, and August. The deadline for Schools of Choice applications is posted on the district website.

Didn't get your parent portal verification email?

- Check your spam folder
- Give it a few minutes to process
- Refresh the page by hitting F5 on the keyboard
- If you have a Gmail account and didn't get the verification email, fill out the “Create Account” information again. We have found out that it sometimes takes two tries for Gmail accounts. You may get a message that an account already exists, that is okay – recheck your email, and the verification will probably be there after the second attempt. We have technicians working on this issue, but Google did a recent update that has created this glitch.
