

WELCOME TO MS. JEANNIE'S CLASS!

SAFETY FIRST 😊

Here are some of the steps we will be taking to keep Room 6 happy and healthy:

1) All frequently used surfaces will be disinfected with a 3 step process several times a day.

2) Staff and children will wear face masks when traveling through common areas.

In the classroom, staff will wear face masks; it is optional for children to wear face masks in the classroom.

3) All toys will be disinfected daily.

4) Seating and cubby assignment will be staggered when possible.

5) Children and staff will wash their hands upon entering the classroom, before transitioning to another activity, and throughout the day when necessary.

YOUR FIRST DAY!

Your first day of school will be filled with FUN! Be sure to wear your mask😊! You will enter the building through the front doors and have your temperature taken. Then you will begin your exciting journey to preschool as you head down the cool hall of your school to Room 6.

ROOM 6

Throughout the school year we will work on literacy, math, science, problem solving, and social and emotional. We will focus on upper and lower case letters, letter sounds, rhyming, alliteration, identifying parts of a book, story discussion, and lots of name writing and cutting.

In math we'll work on number identification, number writing, number ordering, pre-addition skills, and lots of counting. I keep in contact with district Kindergarten teachers throughout the year, and will do everything I can to have your child ready for Kindergarten. Watch for a copy of my daily routine which will be coming home in backpacks on the first day of school.

OUR CLASS MOTTO

WORK HARD AND BE NICE

Besides our many academic goals, my classroom is designed to instill important life skills as well. My goal is to find what motivates each child and invite them to explore and express their interests as much as possible. Every child should feel good about who they are and proud of their contribution to our classroom. I encourage independence, good manners, courtesy, kindness, and teamwork.

MEET OUR ASSISTANT TEACHERS

Ms. Courtney

**NOW LET'S TAKE A PEEK AT OUR
CLASSROOM!**

THE MAGIC CARPET

Here is where we sing, dance, read stories, play games, conduct science experiments, and more! All while trying our darndest to social distance😊.

BLOCK AREA

Throughout the year our little engineers will work on their problem solving, math skills, teamwork, and creativity.

HOUSE AREA

Our house area is a busy place that's always changing. From a beauty salon, to a pizzeria, to your exact house with a Mom calling her child, "sweetie"

CUBBIES

This is where your child will collect all of their cool creations that they will be able to bring home each day to share with their family.

BATHROOM

The journey to this room can sometimes demand some speed. Here is where independence and precision are encouraged😊. lol

SEE YOU NEXT WEEK!

This is my 18th year teaching at Anchor Bay. I received my Bachelor's degree from Wayne State University and additional early childhood requirements from Macomb Community College.

Communication between home and school is so important. Now more than ever. My weekly newsletters are a great resource to learn exactly what your child is doing each week in class.

It's natural to be anxious if you are sending your child off to a new school or a new teacher for the first time. Even more so now. But try to relax. I guarantee your child will learn and grow during the coming months. But most importantly, they will have a ton of fun doing it!

Good luck and stay healthy and happy!

Jeannie Dolan
